## Technical Details & Assembly Note: Programming Adaptor Board

### Introduction: PB2

This programming Board is designed to be used with Serial, ICP and USB programmers detailed elsewhere on this site.

Board contains ZIF sockets of 20Pin, 18Pin and 40Pin.

20Pin socket is used for programming of 8pin, 14pin & 20pin PIC Micro Controllers.

18 pin socket is exclusively for 18 PIN PIC Micros.

40pin socket is used for programming of 28 & 40pin PICs.

Picture of the fully populated Programming Board:

**Parts List:**

Quantity	Part
4	0.1uf Ceramic
1	10K LVP pull-down resistor
1	LVP Selector switch 4 Position DIP
1	6 Pin Male Header
1	40 PIN ZIF Socket
1	20PIN ZIF Socket
1	18PIN ZIF Socket (This may be substituted by a 20 PIN socket in kits)
1	PB2 Double Sided PTH Board

I hope this kit will be useful to many hobbyists.
